PRESENTAZIONE AZIENDA

Chi siamo

Translated is widely recognized as the most innovative web-based translation company. For us, Translated is not just a company. It's a way to think, to do things and to communicate. Just like a language.

Because we foster a culture that inspires talents to do great things. Not only do we constantly look for new solutions, workflows, tools and services that shorten distances and build bridges, but we believe that human creativity and machine intelligence are not mutually exclusive. They can and should be combined to craft consistent quality translations at speed.

This is why we have been offering human translation services for the last 20 years to our 213,225 clients, in 193 languages and 40 areas of expertise, growing every year at a steady rate, increasing our production from an average of 180,000 translations delivered in 2015, to 360,000 in 2018, to 600,000 in 2021.
